Thus, notwithstaning a falling off in the export hence to the areal states known in Liverpool of 200,000 bales, the available supply there was 74,000 in excess, showing 274,000 bales of the deficiency already made good. The reduced purchases in Liverpool of about 9,000 bales about 9,000 bales about 9,000 bales about 9,000 bales are the increased stock held by spinners on 1st Januarry. The 33,000 bales assumed increase in their stocks is therefore supposed to be saved from the consumption since 1st January, fourteen weeks, at 2,500 per week, which we take to be a moderate estimate.

Against the above excess, however, we have still a decrease, as follows, apparent on this side of the Atlantic:
